

MAXIMIZING THE BEST WORK FROM YOUR WORKFORCE

Best Work from your Workforce • Collaboration Leads to Empowerment • Security that Minimizes Risk

Empower your customer-facing employees to do their best work!

Amaxra helps keep your workforce on task and always connected with Microsoft Teams

The Firstline Worker. The smiling receptionist at your dentist, the waiter that knows your favorite dessert, the friendly clerk at your local store. As the first point of contact and “face” of your company,

Firstline Workers are critical to the success of your business because they not only are the first people to interact with your customers, they're the ones who implement new operational improvements, work with your latest products, and represent your company's brand.

The last thing you want is for your Firstline Workers to feel disconnected from company communications, receive outdated resources and material, and work on obsolete tools and apps that can expose the company to security or compliance risks.

A Better Way. Empower your Firstline Workers with a modern, cloud-powered solution: Microsoft 365 with Microsoft Teams. Amaxra, a Certified Microsoft Gold Partner, deploys this customized solution to provide secure and affordable business collaboration for Firstline Workers.

Your business can accelerate productivity and reduce security risks with a Microsoft 365 and Microsoft Teams solution from Amaxra.

Engage through collaboration & productivity, which leads to Worker empowerment, resulting in profitability

A Microsoft Teams solution from Amaxra connects your Frontline Workers to the rest the business, empowering them to:

- Enable real-time, secure communication through virtual meetings, 1:1/group chats
- Share files and organize documents through channels, and co-author files simultaneously, avoiding version control issues
- Train and upskill using the latest sales materials and collateral
- Simplify the business process of scheduling, assign and trade shifts for manager approval through the schedule management tool, **Shifts**
- Assign team/department tasks and track progress through the app, **Planner**
- See the most important and relevant information for that day through the mobile-only experience, **Home**

Do You Wonder...

Are your Firstline Workers equipped to do their best work?

Is your current technology leaving them siloed, disconnected and randomized?

Are they using unsanctioned apps to communicate, creating a security risk for the business?

The Amaxra Difference

1. Amaxra helps you use these powerful tools to create a smart path for your business by strategically organizing your business processes with your workers in mind.
2. We augment (not take place of) your IT with technical expertise needed to battle today's modern security threats.
3. We provide ongoing training and reports to help better manage your business.
4. Amaxra is your direct line to Microsoft when you need support or escalation.

Connect your mobile Firstline Workforce

Provide Firstline Workers access to documents and data anytime, anywhere through the Teams mobile app **installed on the smartphone they already own** (iOS or Android) but is still fully secure within your organization.

Microsoft Teams provides controlled access regardless of location—corporate, field, factory, storefront, or remote.

Additionally, Teams intelligently allows you shape the individual experience by applying predetermined or custom policies by role, ensuring the right resources are available to the right positions when needed.

Teams also integrates third party and line of business (LOB) apps in one customized experience.

Secure your Business and Minimize Risk

Powerful security protection—for your data, your people, and their devices—inherently comes with the integration of Microsoft 365 and Microsoft Teams.

Let Amaxra configure these solutions to your company's specific security requirements.

Our technology team also accounts for and integrates industry compliance requirements. We can also provide ongoing IT environment health reports and continued learning and support, to provide peace of mind that your business is secure.
