

Protect your business from today's security dangers

The harsh reality of today's world is that security and data breaches are exponentially increasing, and **small and medium businesses are NOT immune. In fact, they have become the main target.** Not knowing how/what to configure to each critical security element, nor having the time to gain the knowledge, creates vulnerabilities. Further, as collaborative cloud-based work environments like **Microsoft Office 365**, become the primary way people communicate, it's even more critical for businesses to lock down potential access points—user accounts, email, files, devices—so all unauthorized, mal-intended entry attempts are denied.

- 43% of security breaches involve small business
- C-level executives are 12X more likely to be the target
- Mobile users are more susceptible to phishing links, email-based spear phishing and social media attacks
- 24% of incidents are ransomware (where malware was used)
- The median business email compromise (BEC) costs ~\$25K*

Activate tomorrow's security defense

Your best protection—work with **Amxra**, a certified Microsoft Gold partner, who will configure the **right security software in your IT environment** to help stop external threats and better secure your people, data and devices. Preventing malicious use or accidental damage to your organization's access points—files in the cloud, email/attachments, user accounts, login locations, devices—requires smart and thoughtful design. We will help you understand, configure and unlock the full potential of your Microsoft software investment while helping you secure your environment. You get:

- A more secure cloud environment that ultimately avoids expensive BEC/breach costs, protects your reputation and brings you peace of mind
- An added layer of oversight
- Confirmation of needed security software/licensing, identification of security gaps and redundancies that needlessly increase costs
- Configuration and education of the powerful security protection provided by Microsoft software
- Compliance requirement guidance for your industry
- Ongoing monitoring/reporting (if engaged), and materials/tools for continued learning and support

Do you wonder...

When an employee logs into your network, are you sure it really is that person?

**

Are your employees' emails and the links they click on, secure?

**

Could somebody be impersonating your CEO to socially engineer your employees to purchase gift cards, wire transfer money or cause harm or embarrassment to your organization?

Amxra Difference

1. Our Managed Service creates a **smart path** for your organization, modernizing the security of your Microsoft software environment while focusing on your business goals.
2. We **augment (not take place of) your IT** with technical expertise needed to battle today's modern security threats.
3. Amxra is your **direct line to Microsoft** when you need support or escalation.

Amxra™

Licensing—a critical component of securing your business

Having the right licensing configured properly is a significant component of securing your business and is part of our Managed Service. Although Microsoft makes it very easy to buy licensing direct, **for the same price you are paying now**, purchase from Amaxra, and **realize immediate value of having your security software configured and your business protected**. Be aware that any level of self-service can be very costly and just having the products is not enough—they need to be configured and maintained correctly.

We understand our customers' implementation timelines and thresholds vary, which is why we offer different engagement packages. Reference our engagement chart to see why **buying from Amaxra will save you time, reduce frustration, and maximize your investment**.

Industries

Security & Licensing is applicable to ALL Industries

Security and Licensing from Amaxra = IMMEDIATE VALUE ADD AT ANY LEVEL

Security and Licensing	Basic	Recommended	Premium
	\$750 value of Security and Licensing services AT NO ADDITIONAL COST	\$2,500 value included	\$5,500 value services included
Your Objective	<p>Want to ensure your PEOPLE are who they say they are when they logon?</p> <p>Spend what you are paying now, but also get a more secure environment, a Licensing audit and MFA configured.</p>	<p>Want to also ensure your PEOPLE are protected against rogue links or spam emails, while receiving security alerts/reporting?</p> <p>Add \$3.50/user/month and get user protection, email protection, safe link protection, and an initial security audit report of your environment alerting you to risks (i.e. too many admins, emails forwarded outside your company, etc.)</p>	<p>Want assurance that your DATA stays secure if lost, stolen or if an employee departs?</p> <p>Add up to \$12.50 to \$24.50/user/month and get Windows 10 protection, device and data management, ability to wipe devices remotely, and a lot more.</p>
Licensing Cost [⌘]	What you are spending now, buying from Microsoft directly	\$3.50 additional/user/month	<p>Office 365 Business: up to \$12.50 additional/user/month</p> <p>Office 365 Enterprise: up to \$24.50 additional/user/month</p>
Microsoft Software	Any Office 365 license	Office 365 Business or Enterprise <i>(several options available)</i>	Microsoft 365 <i>(several options available)</i>
Identity & Access Management <small>(authenticated logon)</small>	★	★	★
User Account & Threat Protection <small>(scanning the dark web for stolen passwords; spamming/phishing email protection; attachment/malware protection; rogue link protection and safe link creation)</small>	--	★	★
Information Protection <small>(data is encrypted)</small>	--	★	★
Device Protection <small>(protection of data on devices; device logon; remote device shut down; data transfer to new machine; Intune-sets company-wide policies much easier)</small>	--	--	★
Device Management	--	--	★
Licensing	<p>Amaxra will audit/manage your Licensing, ensuring you are not paying for anything you don't need and providing additional oversight on your behalf.</p> <p>Learn more: The scary reason why every business needs their Office 365 to be partner-managed</p>		
Reporting & Monitoring Services	<p>Amaxra can also provide ongoing monitoring and detailed customized reports based on your organization's needs and level of required data, for an additional fee.</p>		

Microsoft sells you the software but does NOT:

- Provide a relevant framework and put it together
- Set up or configure the software
- Instruct on what each product does or how it inter-relates to other software or programs

⌘ Depending upon your current licensing, amount/user/month could be less. These costs do not include consultative time for data migration. T&E may apply.
